## Elms College Faculty Presenters

- **Peter DePergola**, Ph.D., MTS, Bioethics and Medical Humanities
- **Gina Mazza**, MBA, BSN, Healthcare Leadership
- **Stephen Walsh**, Ph.D., Artificial Intelligence and Machine Learning

## Why Attend?

In today's rapidly evolving business landscape, leaders who understand how to ethically integrate AI gain a competitive advantage. This focused 30-minute session will equip you with:

- Practical frameworks for aligning AI tools with your organization's values
- Actionable strategies to detect and eliminate bias in critical business decisions
- Leadership insights on using AI as an "ethical mirror" for better decision-making
- Real-world applications that balance progress and people

## What You'll Learn...

- Core dimensions of ethical leadership in the age of AI
- How to use AI to serve people, not just productivity
- Techniques for becoming a moral steward of technological innovation
- Ways to ensure AI enhances—rather than replaces—human leadership

## Designed For...

- Business leaders
- Executives
- HR professionals
- Decision-makers navigating AI integration in their organizations
- Students are welcome to attend
